# 2019 Wonder of Art and Technology

10.15 Tue. — 11.03 Sun.

In the fast-changing modern life, technology has become a necessity and a spectacle in daily life. The phenomenon looks cold, but it also becomes “humane” because of the intervention of art. What kind of cause and effect is it? With the axis of “spectacle,” the 3rd Art × Technology Festival explores the endless possibilities of contemporary art in technology through the four exhibition areas, “Spectacle and Machine,” “Spectacle and Digital Time,” “Spectacle and Life,” and “Spectacle and Performance.” This time we present the seventeen digital art works of new media by the groups from Taiwan, Japan, China, France, and Australia, including the great activities such as digital performances, workshops, sharing sessions, and cross-school work camps. By introducing the influence of technology and art to life, we expect to encourage the public’s concern and discussion about the different issues in the new world.
