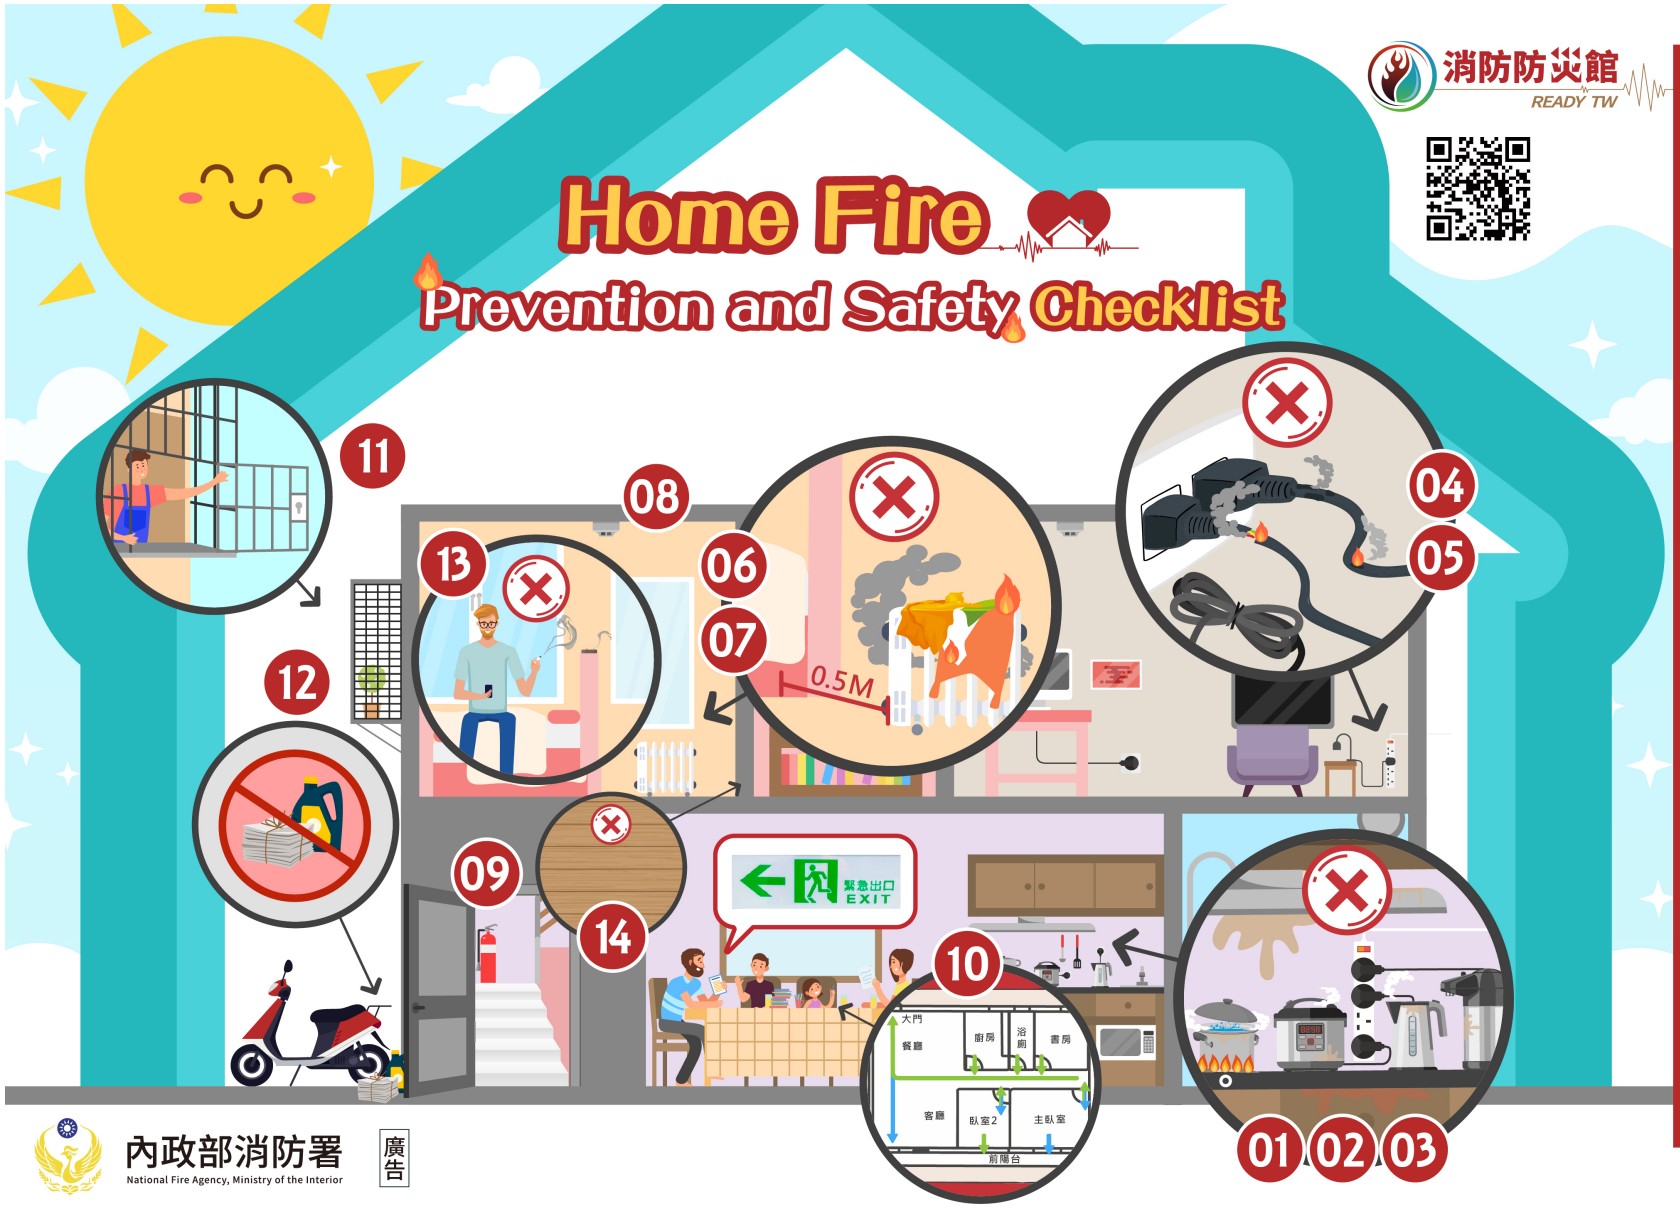
Prevention and Safety Checklist

消防防災館
READY TW



Please Check!

Have you done all the fire safety instructions?

- ☐ 01 Clean the greasy gas stove and range hood frequently in order to prevent the oil pan from burning extensively.
- ☐ 02 Remember to turn off the gas stove after you finish using it or need to be away from it temporarily.
- ☐ 03 Electric cookers, ovens, electric water heaters, microwaves, electric stoves, and toasters...etc. which have high power consumption should be plugged into sockets with different circuits and should avoid being used simultaneously.
- ☐ 04 Electrical plugs should be cleaned and wiped periodically. The wire cover should also be checked whether it is aged, damaged, and broken.
- ☐ 05 Choose expansion cords with qualified inspection marks and attached protective system. They cannot be bundled for use.
- ☐ 06 Do not use incandescent light bulbs or heaters to dry clothes or quilts.
- ☐ 07 When using an electric heater, keep it away at least 1 meter away from combustibles.
- ☐ 08 Residential fire alarms should be installed in bedrooms, kitchens, stairways, and hallways and inspected every month routinely.
- ☐ 09 Equip your home with fire extinguishers and be familiar with the operating procedure which includes, " pull, aim, press, and sweep. "
- ☐ 10 Be familiar with evacuation routes that has multiple directions and methods of how to open the doors and windows.
- ☐ 11 If you have installed iron windows at home, remember to reserve escape exits and check whether they can be opened.
- ☐ 12 Do not pile up debris in the staircase, near the doorway, and escape exits. These routes must remain unblocked.
- ☐ 13 Do not smoke when taking medicine, drinking alcohol, and before going to bed.
- ☐ 14 Check whether if your home is built with fire-resistant materials and flame-proof items.
